PRELIMINARY AMENDMENT UNDER 37 C.F.R. § 1.115

TO THE COMMISSIONER OF PATENTS:

In the Claims:

Please cancel Claims 1-20.Please add Claims 30-36 as follows:

C
30. A computer network-based method for identifying a disease-influencing gene, the method comprising:

selecting a disease for study, wherein an environmental, behavior risk factor and physiologically are associated with the selected disease;

defining an environmental and behavior risk factor and associated with a disease;

creating at a computer system script-based queries for determining environmental and behavior risk factors;

presenting to a plurality of individuals of disease and non-disease populations on a remotely programmable apparatus having a user interface the presenting script-based queries for environmental and behavior risk factors, wherein the remotely programmable apparatus is coupled to the computer system over a network;

recording a physiological condition of the individual using a monitoring device attached to the remotely programmable apparatus;

transmitting answers to the script-based queries and the recorded physiologic condition from the monitoring device from the remotely programmable apparatus to a main computer over a communications network;

storing the answers to the script-based queries and the recorded physiologic condition in disease and non-disease databases coupled to the main computer based on the individual associated with the answers and the recorded condition;
